TO WHOM SO EVER IT MAY CONCERN

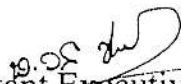

Sub: Existing School of North Hill International School

* * * * *

This is to state that the existing high school buildings consisting of R.C.C frame structure. The said structure had been designed for brick masonry partition walls. Hence the structure is stable and any changes done to partition walls as per architect's drawing doesn't affect the stability of structure of its own.

The existing all buildings of structure is well maintained and in good condition without any sign of structural distress. To the best of my knowledge and belief the said structure is stable and suitable for the purpose of running a school for which it is in use.
